December 2020

Dear Family and Friends:

I hope this finds all of you staying well. It is a trying time across the world. We don't know of anyone personally that has died from Covid, but several who have had it. I'm sure glad I'm not working in a hospital any more. I think the near future will be better. We will get the vaccines as soon as possible.

Keith is still having problems. He had his third back surgery in February. The back is good now, but is having a lot of knee pain. He had it scoped in September with torn cartilage. He will end up with a total knee.

I have nerve damage in both legs - probably from an antibiotic taken for diverticulitis. Therefore, I stumble around some. My familial hand tremors are worse. Oh well, there are a lot worse things!

My youngest brother was diagnosed with glioblastoma in September (an aggressive brain cancer). I went back to Illinois in October to see him. My sister from Florida came. I saw all five brothers, one sister, cousins, nieces, nephews, etc. Ed is 63 years of age.

Merry Christmas

*If RMMR is in Co. Springs, we won't be going.
Too far! So sad*
